## EDITORIAL BOARD

**Joan Cunningham** (Ph.D. Public Health: Epidemiology) is a cancer epidemiologist, recently retired from the Medical University of South Carolina. She holds an MSc (Biology: aquatic eco-embryology) from the University of Guelph, Ontario, Canada and Ph.D. (Public Health: epidemiology) from the University of Texas School of Public Health (Houston). Her work focuses on racial disparities in breast cancer, and non-pharmacological mitigation of cancer treatment side effects. She also gives invited lectures on cancer epidemiology to the graduate program at the University of Texas Health Science Center at San Antonio, Texas.

**Amanda Haste** (Ph.D. Musicology; Dip.Trans.IoLET) is a British musicologist and academic translator whose research interests include identity construction through music and language. She is a member of the Chartered Institute of Linguists and teaches courses in Translation and in English for Specific Purposes at Aix-Marseille University, France. Her research has been published in leading journals and books by major editors, and she co-authored *Constructing Identity in an Age of Globalization* (Paris: Ex Modio, 2015); and her awards include the Louise Dyer Award for research into British music, and the Elizabeth Eisenstein Essay Prize (2018).

**Jordan Lavender** (Ph.D. Spanish Linguistics) teaches Spanish and Latin American History at Pomfret School in Pomfret, CT and has conducted research on the use of minority languages on Twitter in Spain, bilingualism in the linguistic landscapes of Azogues, Ecuador, and forms of address in Ecuadorian Spanish, based on ethnographic research in both online and offline contexts.

**Annie Rehill** (Ph.D. Modern French Studies, MFA) specializes in the literature and history of Francophone Canada, focusing on intercultural expressions and implications. Most recently she has studied Métis literature and art. Previous work in ecocriticism centered on representations of the Canadian *coureur de bois* figure, and on Francophone Caribbean writings. Her publications include "Le Travail dans la nature canadienne: L'Équilibre (et le déséquilibre) humain tel qu'il est représenté par Louis Goulet et Joseph-Charles Taché" (2018); "An Ecocritical Reading of Joseph-Charles Taché's *Forestiers et voyageurs*" (2018); *Backwoodsmen As Ecocritical Motif in French Canadian Literature* (2016); and "Inscriptions of Nature from Guadeloupe, Haiti, and Martinique" (2015).

**Shelby Shapiro** (Ph.D. American Studies), the General Editor of *The Independent Scholar*, served for many years as the English-language editor of *Tsum punkt/To the Point*, the magazine of Yiddish of Greater Washington, as well as for its predecessor publication, and was Associate Editor of *Records of the State of Connecticut* from 2012 to 2021. His Ph.D. dissertation dealt with acculturation and American Jewish women in the Yiddish press; he is a Yiddish-English translator, and his research interests include Jazz and Blues (having presented jazz radio programs for nine years), the labor movement, the First World War, and immigrant anarchism.

## NOTES FOR CONTRIBUTORS

All members of NCIS and their affiliated Partner Group organizations are cordially invited to submit manuscripts to *The Independent Scholar* (TIS). We welcome submissions in the form of traditional essays as well as creative or artistic material on any topic that will appeal to our members. Your manuscript may be presented in the TIS house style and should be referenced according to APA style. It should conform to the academic standards demanded by NCIS and will be subjected to a robust peer review process. Please consult the [submission guidelines](#) before submitting material, but if you have any queries don't hesitate to contact the relevant member of the TIS Editorial Board. Manuscripts and queries should be sent to the General Editor at [tis@ncis.org](mailto:tis@ncis.org).

If you have a book you would like reviewed, or you would like to offer to review a book, please email the Book Review Editor on [reviews@ncis.org](mailto:reviews@ncis.org). As a guide to length and content, you can download previous reviews from <https://www.ncis.org/book-reviewsthe-independent-scholar-tis>.

## About NCIS

*The National Coalition of Independent Scholars is a 501(c)3 nonprofit corporation (est. 1989) which supports independent scholars worldwide and provides them with a valuable scholarly community.*

*NCIS represents independent scholars from every continent and in many disciplines in STEM and the Humanities. Its members include unaffiliated scholars, adjunct and part-time faculty, emeritus professors, graduate students, researchers, artists and curators. The benefits of membership are many, but the great benefit of joining NCIS is affiliation with an internationally recognized intellectual society.*

*Today, NCIS is an international organization whose members hail from many countries and pursue diverse fields of study in a variety of disciplines. This is the population NCIS proudly serves.*

## Member Benefits

NCIS MEMBERSHIP offers opportunities for travel and research grants, member discounts and academic support.

FREE MEMBER RESOURCES include your own member profile page, an NCIS.org email address, and NCIS letters of introduction.

ACADEMIC OPPORTUNITIES & RESOURCES include publication in and/or peer reviewing for *The Independent Scholar*, book reviewing (or having your own academic book reviewed), free webinars and access to resources on academic skills such as presenting conference papers, chairing conference sessions, and publishing your work.

GRANT AWARDS for which members may apply include NCIS Conference Support Grants and NCIS Research Grants (six awards per year) and the annual Elizabeth Eisenstein Essay Prize. More information on all these can be found at [www.ncis.org/grants](http://www.ncis.org/grants).

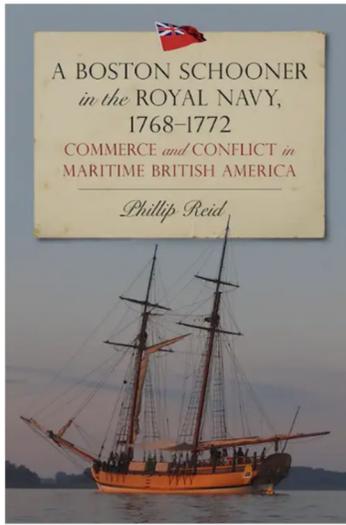

MEMBER DISCOUNTS are offered for JSTOR Journal Access and Nota Bene referencing software, and also on Professional Writing and Translation Services from NCIS members.

NETWORKING OPPORTUNITIES include discussion groups on Facebook, Twitter, LinkedIn, collegial support services, regional and online member gatherings, and international NCIS Conferences at major academic institutions.

*Find us, follow us, friend us on [Facebook](#), [Twitter](#), [LinkedIn](#), [H-Scholar](#) and [Academia](#).*

**Review by Stanley Carpenter. Review was first published online 16 October 2023 and will appear in Volume 10 of *The Independent Scholar*.**

Phillip Reid, an independent scholar specializing in maritime history has put his academic accomplishments to good use in *A Boston Schooner in the Royal Navy, 1768-1772: Commerce and Conflict in Maritime British America*. A graduate of the highly regarded program in maritime history and nautical archaeology at East Carolina University (MA, 1998), he focuses on Atlantic World history, maritime history, and nautical technology, especially British Atlantic merchant ships of the seventeenth and eighteenth centuries. Accordingly, he is well-suited to produce a history of His Majesty's Schooner *Sultana*. Originally built as a trading vessel, she was commissioned into the Royal Navy (RN), reconfigured, and served on the North American customs and anti-smuggling patrol from 1768 to 1772 under the command of Philadelphia native Lieutenant John Inglis (retired as rear-admiral) and Master David Bruce.

Reid argues that considerable overlap existed in nautical technology and personnel between the merchant world and the military. Accordingly, that allowed the RN to purchase small merchant ships and convert them to anti-smuggling and customs patrol craft. Smuggling was rife in the 18th century in New England, especially Rhode Island and Narragansett Bay

where hundreds of protected inlets provided ready sanctuary. While larger warships such as frigates had difficulty navigating the inlets and bays, smaller vessels such as sloops and schooners proved ideal for customs enforcement. Such was the case of the Boston-built schooner *Sultana*. The ship's history provides a wealth of archival data on the nature of period civilian merchantmen and commissioned warships. *Sultana* is an excellent laboratory for analysis of the vessels that plied the British Atlantic and North American coastal trade just prior to the War of American Independence. *Sultana* thus "presents a rare opportunity to explore the intersection of naval and maritime history – of commerce and the conflict it generated – in the eighteenth-century British Atlantic" (xii). But the study of HMS *Sultana* provides a broader picture – that of the relationship of the North American trade, commercial, and shipping industry to the wider British mercantile economy. It highlights the technological aspects of period nautical science. And it provides an insight into how the use of such vessels illustrates the political and strategic aspects of British North American governance and trade relationships on the eve of the American War of Independence. Those features, besides the highly technical and engineering details, are the real value of

this work.

The passage of several acts in the 1760s designed to raise revenue from the American colonial trade such as the American Revenue Act required increased enforcement of customs laws and tamping down smuggling. Accordingly, British officials were authorized to purchase civilian merchant ships for conversion to what might be called “revenue cutters” today. *Sultana*, built in Boston in 1766 by Benjamin Hallowell, Boston’s most prominent ship builder, was typical of those purchases. Sailing to England, she was fitted out as a warship at Deptford in 1768 that included mounting swivel guns. The commissioning of such small, formerly commercial vessels as revenue patrol craft reflected the difficult conditions following the Seven Years’ War (1763) where the RN experienced dramatic downsizing in personnel and warship hulls, all complicated by decreasing budgets (naval estimates). *Sultana* was a “work around” as a method of providing coastal patrol forces while minimizing the impact on global and imperial warship requirements. It was, as Reid highlights: “an expedient that sprang from a post-war combination of new and unprecedented demands on the central government and the treasury, a maturing of the mostly autonomous British American maritime commerce economy, and the political instability of George III’s early reign” (142). He notes that *Sultana* was not a traditional naval vessel. As a conversion from merchantman to warship, she was “of necessity, improvisational technology serving improvisational policy” (143). In short, the Crown use of such non-traditional vessels represented a shortage of regular warships needed to enforce the new revenue and commercial regulatory policies.

The balance of the book highlights the ship’s journeys to and from America and service in the Chesapeake and Narragansett Bays and Delaware River before decommissioning in 1772. The work expresses Reid’s true love – maritime and nautical technology. Therein lies a potential trap for any author should they delve too deeply into the ins and outs of a highly technical subject. Fortunately, he has made the technology and details of period ship construction and sailing easily understandable to the general reader. He provides an excellent glossary. The one criticism is that the work would benefit from drawings and diagrams to illustrate the technological aspects visually. Modern readers are increasingly visually oriented; good diagrams and figures would enhance the readers’ understanding of the Age of Sail’s complex technology.

Of equal value is the analysis of period RN dynamics. He addresses in depth: the technology and methodology of sailing small vessels on open ocean and inland waterways; navigation in the pre-Industrial Age; eighteenth-century naval discipline; procedures for revenue, customs, and anti-smuggling operations; and life in the RN, including desertion, impressment, discipline, personnel relations, and rank hierarchy.

Despite her limitations in size, speed, and weaponry, overall, *Sultana* succeeded in her mission. Yet, that factor proved ironic. Mission success only further aggravated colonial resentment of the new revenue and commercial policies. That anger sometimes led to outright open defiance as illustrated by the *Gaspee* Affair in June 1772 in Narragansett Bay. Another example was the sugar trade from the West Indies. Reid highlights that 75 per cent of the cargo intercepted was sugar products, a fact that no doubt agitated the New England rum distilling concerns!

As an historical scholarly work, the book is very solid. The primary sources are excellent ranging from the Admiralty Papers in the British National Archives to the commander’s notes and the master’s logbook. Lieutenant Inglis and Master Bruce kept copious notes, all of which give authority and authenticity to Reid’s analysis of the technical and day to day activities of the doughty little warship conducting a hazardous and unpopular mission. It is most highly recommended for naval historians, those looking at the dynamics and context of the American Revolutionary period, and the general reader fascinated by the Age of Sail.

**Stanley D.M. Carpenter** (Ph.D. British Military History) served as the Strategy and Policy Division Head for the College of Distance Education at the United States Naval War College in Newport, Rhode Island, and was a Professor of Strategy and Policy. Professor Carpenter retired from the US Navy in June 2009 with the rank of Captain after thirty years’ service. He authored *Southern Gambit: Cornwallis and the British March to Yorktown* (Norman, OK: University of Oklahoma Press, 2019) and was co-author of *The War of American Independence, 1763-1783: Falling Dominoes* (London and New York: Routledge, 2023).
